

Kerala Ceramic Roof Tile

Tangshengyuan Ceramics is a large-scale manufacturer of Kerala ceramic roof tile in China. We have been producing Kerala ceramic roof tile for over 30 years and have extensive experience, exporting them to the world for over 15 years. Due to advanced production equipment, we can automatically produce Kerala ceramic roof tile which can save our labor costs and provide our customers with preferential prices. The

favorable price advantage has enabled us to again access to a wide range of markets, such as Asia, Southeast Asia, and Europe and the U.S.A. We are looking forward to becoming one of your reliable Kerala ceramic roof tile suppliers.

Kerala Ceramic Roof Tile

Product Introduction of the Kerala Ceramic Roof Tile

Tangshengyuan® Kerala ceramic roof tiles are exported to more than 1500 containers overseas, and these Kerala ceramic roof tiles are salvaged from the "Nanhai No. 1", the most important porcelain production site in Jinjiang, China. It adopts a brand new imported press with strength of 3800 tons and is fired in a kiln with temperature of over 1200 degrees, ensuring superb craftsmanship.

Due to the support of high-tech production equipment, our Kerala ceramic roof tile has many advantages such as never fading, cold-proof, pressure resistance, corrosion resistance, sound-proof, thermal insulation, natural matte glaze, noble and elegant, low carbon, green and environmental protection. With these quality advantages, our Kerala ceramic roof tile has been widely welcomed in the world market since they were introduced.

Product Specification of the Kerala Ceramic Roof Tile

Product Name:	Kerala Ceramic Roof Tile
Material:	Ceramic、 Glazed、 Natural Sand
Size:	300*400*10 mm
Weight	2.5kg/pcs

Compression	Strong body can bear more than 250 kgs
Water absorption	1-6%
Certificate:	Architectural Ceramic Quality Supervision
Packing	Rope packing, 9pcs/bundle, carton packing, 9 pcs/ctn, pallet packing, 64 ctns/pallet

Details of the Kerala Ceramic Roof Tile

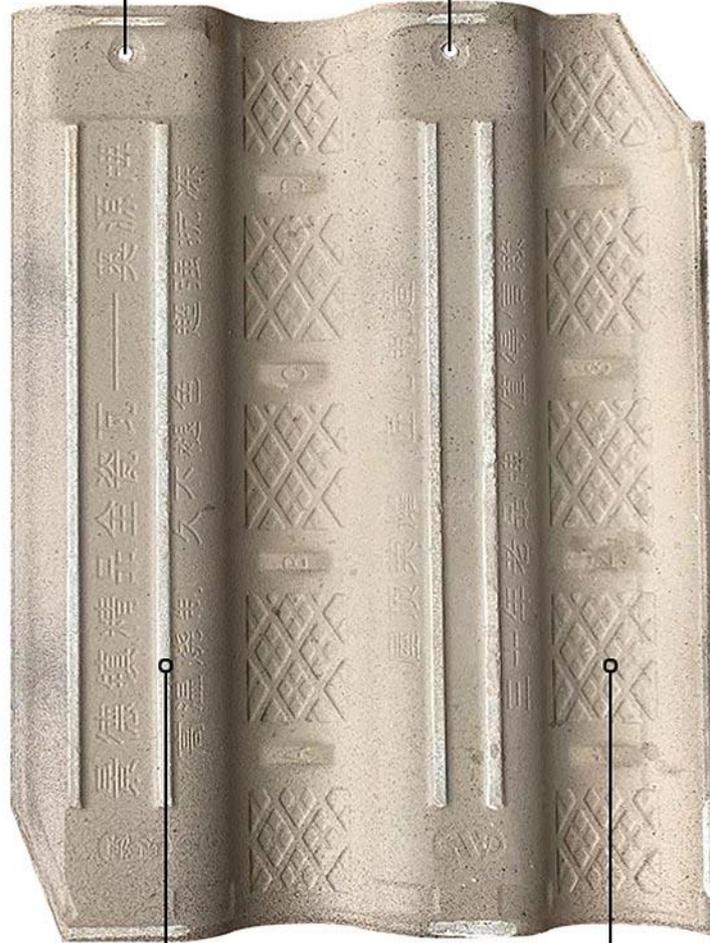

Our Kerala Ceramic Roof Tile has many features, such as specially designed waterproof grooves, newly designed three water-baffles and specially designed water flow grooves which can make the Kerala ceramic roof tile more efficient in waterproofing.

On the backside of the Kerala Ceramic roof tile, there are two holes on the top of Kerala ceramic roof tile, which make the installation of the Kerala ceramic roof tile easier and allow for hands-free operation, saving costs for customers. The four vertical lines greatly improve the adhesion of the Kerala ceramic roof tiles and the mesh-lie fixing design is the most distinctive and unique among other roof tiles on the market.
